Funding Material Transfer for Industrial Area Operable Units

Harry P. Mann  
General Manager  
EG&G Rocky Flats, Inc.

Materials removal from the Industrial Area Operable Units (OU) No. 8, 9, 10, 12, 13, and 14 in Fiscal Year 1994 is critical to allow for completion of Environmental Management activities. Material removal from the Industrial Area OU Individual Hazardous Substance Sites is necessary for implementation of non-intrusive field work (surficial soil sampling, radiation surveys, soil gas surveys, and asphalt sampling). In addition, limited intrusive activities are also required (soil borings and monitoring wells). We have concluded that this activity should be funded by plant operations rather than Environmental Restoration. Please submit an action plan (including Change Control) for this activity within twenty days of receipt of this letter. Because InterAgency Agreement schedules are being impacted, the removal of these materials should be implemented immediately.

  
Mark N. Silverman  
Manager
